

Keep your dental billing process with

Secure Claim Dental[®]

simple, electronically and secure.

“Don’t wait another day to take advantage of this valuable offer and start saving money and increasing available resources.”

Software Overview

PASHEALTH Dental billing software has all of the components necessary to allow an office that is currently performing their daily patient billing related operations via paper and telephone and migrate those manual tasks, simply and easily, to an electronic process.

These processes will save the business time, increase administrative efficiency, lower operational overhead, and ultimately improve cash flow by providing enhanced revenue management tools. Because today’s dental market requires that specific attention be focused on the technology needs of the dental provider and practice administration.

PASHEALTH offers Direct Data Entry (DDE) of claims

PASHEALTH Secure Claim Dental offers the smaller practice the ability to submit dental claims electronically. The software maintains a local database of all patients for which billing has been performed. Unlike web based claim entry systems,

PASHEALTH Secure Claim Dental claim submission does not require broadband access and an ‘always on’ connection.

Upon connecting to the PASHEALTH information exchange, PASHEALTH Secure Claim Dental software will synchronize and update itself so the user will always have the most current version available to the market place.

Tracking your claims is fast and easy with PASHEALTH web portal!

In addition to claim submission, users will be able to verify patient eligibility and benefits at the point of care, perform claim status inquiries, and track claims thru the reimbursement process. This functionality is provided in PASHEALTH Secure Claim as well as the PASHEALTH web portal solution offering the ability to view submitted claim reports, recall data, manage business analytics and create related reports real-time.

PASHEALTH Secure Claim Dental Benefits

PASHEALTH provides a great number of benefits; some of them are:
